Olivia F. Benson

There is much change and transition happening in the world at the moment. Despite all the chaos we see, there is still reason to be hopeful. It is good to be alive to see the changes and be a part of them. In my books I speak about things many of us might not have spoken about publicly before. I use these opportunities to talk openly and freely about many difficult and challenging things I experienced in my life.

I have been a student and practitioner of Metaphysics for over thirty years. I was a student of the late Reverend Dr. Mary A. Tumpkin, the former president of the Universal Foundation for Better Living, Inc. and the former founder and Senior Minister of the Universal Truth Center for Better Living, Inc. I also served as her legal counsel in both of those positions. I have been a practicing attorney in Florida for more than thirty years; and am a graduate of the University of Miami Schools of Business and Law.

My most recent book is ***For the Love of my Father—A Spiritual Guide for Women Healing From the Absence of a Father in the Age of Spiritual Evolution***. In it I share the gut-wrenching childhood experiences that created a perfect storm of circumstances, leaving gaping holes my Soul. I share the keys to my healing and discuss how important it is for women to heal ourselves so we can take our rightful place in the world.

I offer hope, allowing women to see, that despite how difficult it can be to grow up without a father, we can be made whole. ***For the Love of My Father*** addresses men as well, assisting them in supporting women while on the healing journey to overcome the absence of a father. It is also intended to help men who were or are absent fathers, by providing insight, as well as perspective on their role, and the impact their absence has in their daughters' lives.

In my first book ***Answers From Within—Answers to Work Life Issues in the Age of Spiritual Evolution***, I re-examine many of the things we believe about ourselves and life on the Planet. The book is both tantalizing and provocative and offers alternative perspectives to many of our core beliefs about our existence on the Planet. Ultimately all of this leads to a new perspective about the work we are here to do on the Planet.
